EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Larry Coats on 14 January 2005.

The application has been amended as follows:

Claim 3, line 2, "a wire" has been changed to ---the wire---

Claim 10, line 2, "one mandrel to another mandrel" has been changed to ---one of the mandrels to the other of the mandrels---

Claim 17, line 11, "the axis of the two mandrels" has been changed to ---the two axes of the mandrels---

REASONS FOR ALLOWANCE

Applicant's arguments, see Appeal Brief pages 4-7, filed 15 November 2004, with respect to claims 1, 10, 17, 19-21, 42 and 43 have been fully considered and are persuasive. The rejection of claims 1, 10, 17, 19-21, 42 and 43 has been withdrawn.

The most relevant prior art of Pietroni (US 3,980,244) teaches a traverse for a wire winding machine the moves in an arcuate path between a first and a second point, with the first and the second point located outside the axes of the two mandrels. A conventional wire

Art Unit: 3654

winding machine is taught by Kotzur et al. (US 5,678,778) that has a traversing device that slides back and forth in a linear path, and the movement is confined between the axis of the two mandrels. Although moving a traverse in an arcuate movement path is taught by Pietroni and confining a traverse movement path between the axes of two mandrels is taught by Kotzur, the combination of the two teachings can not be made without significant structural changes to either wire winding machines and there is no motivation to make such a combination.

The following is an examiner's statement of reasons for allowance: Claims 1 and 17 are allowable because the teachings of the prior art taken as a whole do not show or render obvious the combination set forth, including: having the traverse movable along an arcuate path between a first and second position, and the arcuate movement of the traverse is confined to be between the two axes of the mandrels.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

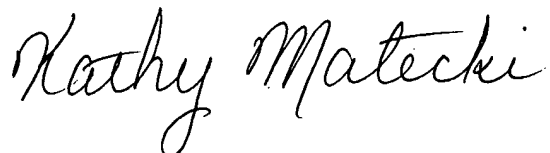

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Evan H Langdon whose telephone number is (703)-306-5768. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kathy Matecki can be reached on (703)-308-2688. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
